

PINE LAKES RANCH NATURAL GAS PROJECT

ABOUT

Xcel Energy is replacing 13,000 feet of natural gas line and customer service lines within the Pine Lakes Ranch manufactured housing community located in Thornton, Colorado. This work strengthens infrastructure in Thornton and allows Xcel Energy to continue to provide safe, reliable service while meeting the need for increased natural gas service in growing areas of the Denver Metro area.

Construction work is anticipated to begin spring 2026 and last between 6 – 8 months. Work will start with Phase 1 and continue to the next phases. Work may happen in areas simultaneously once started.

CONSTRUCTION

Xcel Energy's goal is to limit inconveniences during construction work. Service interruptions are not expected during this project. Activities you may see during construction include:

- Temporary lane closures or shifted lanes.
- Temporary impacts to sidewalks or side yards.
- Temporary access changes.
- Traffic control measures like flaggers and signs.
- Construction noise.
- Visible temporary flame from flaring.

At no time will any on-site Xcel Energy employee or authorized contractor associated with the Pine Lakes Ranch Natural Gas Project need to obtain account information. Ask to see a company ID if someone is on your property and claims to be working for Xcel Energy, regardless of the work being performed.

After replacing and updating the existing natural gas line, Xcel Energy's crew will work to restore the area to pre-construction conditions.

SAFETY

Public safety is at the foundation of all we do. The safety of the public influences every decision we make. We take a proactive approach to public safety by implementing safety measures before, during and after construction.

If you ever suspect a natural gas leak, leave your home or business immediately. Once safely away, call 911, then call the gas emergency hotline at 800-895-2999.
